ENGINEERED EXCELLENCE
OUTPERFORMING THE COMPETITION

Why Progressive:

Progressive Materials manufactures a full line of the highest quality spray foam systems, silicone coatings, and primers.

Our roof products' proprietary chemical formulations, produced from the finest raw materials, will ensure that the roof installed keeps leaks and bad weather out of your facility.

With such high-quality products, we are very selective and train only the best contractors to apply our systems. This partnership of excellent materials and superior application is backed by a full system warranty up to 20 years.

ENERGY EFFICIENT
- *Highest industry insulating R-values per inch*
- *Coatings that reduce energy costs by reflecting sunlight and radiant heat*

HIGHER PERFORMANCE
- *40 years of excellent SPF performance results*
- *Durable in extreme weather conditions and moderate ponding water*

SUSTAINABLE
- *Seamless systems lower your maintenance costs*
- *System application negates tear-off and disposal, which reduces landfill waste*

High Performance Roofing Systems

The products manufactured by Progressive Materials offer vastly superior results compared to traditional roofing products.

SPRAY FOAM ROOFING

Pro-Poly Sil LS 2200 Series Solvent Based Silicone Roof Coating is a one-component, moisture-curing silicone roof coating system designed for use on sprayed in place polyurethane foam. The seamless, flexible membrane offers long-term protection by withstanding weathering, aging, oxidation, wind-driven sand, rain, snow, and the effects of ozone and ultraviolet radiation. LS 2200 series is available in white, tan, light gray, and dark gray. Custom colors are available upon request.

Pro-Poly Foam SF 4228 & SF 4230 Series Polyurethane Foam is the most efficient form of thermal insulation available. It can be applied to surfaces with irregular shapes and penetrations, which makes it an excellent commercial and industrial roofing product.

SILICONE ROOF COATING RESTORATION (RCR)

Pro-Eco Sil HS 3200 Series High Solids, Low VOC Silicone Roof Coating eliminates the need for removal of the existing roof, adding a remarkable cost savings for any size project. Our "green," one-component, moisture-curing silicone roof coating system is designed for use on existing smooth BUR, modified bitumen, granulated cap sheet, concrete, metal, and various single ply roofing membranes.

The HS 3200 Series is available in white, tan, light gray, and dark gray. Custom colors are available upon request.

Contact Progressive Materials for more detailed specifications on our roofing systems and to find a certified contractor near you.
