

Introduction

Progressive Materials' Roof Coating Restoration System offers a full line of silicone roofing products, accessories, and primers that improve roof performance and extend roof life.

Our high-solids, low VOC, single-component, 100% silicone roof coatings offer unparalleled waterproofing performance. Silicone is extremely flexible, cures rapidly (2-6 hours), and resists oxidation, severe weather, ozone, UV rays, and many chemicals that can damage your roof.

Key Benefits

- Half the cost of a roof replacement
- Easy installation
- Leak-free guarantee - up to 20-year warranty
- Resists wash-off during rain extending the installation window
- Environmentally friendly
- Completely seamless membrane
- Will not chalk or degrade from UV exposure

Save Money

By using a PM silicone roof coating you will pay roughly 50% the cost of a roof replacement. How?

1. No roof tear off - cuts time in half
2. Half the crew size needed for a replacement
3. Half the crew size. Half the time. Half the cost

Easy Installation

Simple three step process:

1. Clean, prep, coat
2. In most cases, primers are not necessary
3. Applied coating won't wash off during rain

Great Warranties

5, 10, 15, & 20 year watertight warranties available

Environmentally Friendly

PM silicone roof coatings help the environment in a multitude of ways:

1. Low VOCs
2. Reflects up to 88% of the sun's UV rays, saving on energy costs and elongating HVAC lifespans
3. Keeps tons of roof tear-off trash out of landfills
4. Can be coated over when necessary

Seamless Membrane

Most leaks begin at the roof's seams. Eliminate the seams and eliminate most of the trouble areas. Simple maintenance will greatly prolong the coating's life.
