

SILICONE ROOFING SYSTEMS

Ready Patch Fibered Sealant Emergency Repair Coating

What is Ready Patch?

Ready Patch (RP 300) is a fibered mastic designed to stop leaks instantly - even under water! This thick, viscous coating can be applied on flat or vertical surfaces and keeps water out instantly. Its viscosity and tensile strength offer a strong and lasting bond and its flexibility makes it the perfect sealant for hard-to-reach areas. RP 300 will cure out completely in wet or dry locations and will result in a flexible patch over holes, cracks, or splits, as well as around flashings, vents, metal edging, and more!

Benefits

RP 300 is one of our most versatile products and a "must have" on any roofer's truck. Here are some of the core benefits of this product:

- Can be applied under water/on wet surfaces
- Adheres to almost any surface
- Can be re-coated with silicone or acrylic coatings
- Easy installation
- No mixing necessary
- Low VOCs
- Works on KYNAR® metal
- Can be applied as low as -20°F
- Low flash point
- Freeze thaw stable

Installation Guidelines

This product can be installed quickly using these steps:

- Remove any dirt, frost, gravel, or loose debris from the application site.
- Apply 1/8" to 1/4" of the coating to the desired area.
- Use a trowel or putty knife to manipulate the coating into the trouble area.
