PREMIUM COATING SYSTEMS

Flashing Grade Silicone

- Thick coating that can be applied with a brush or out of our 20 oz. sausages.
- Available in white, tan, light gray, dark gray, black, and clear.
- Apply to seams/penetrations.
- Can be used on vertical surfaces.
- Apply up to $\frac{1}{4}$ " thick.
- UV stable.
- Low VOCs.

Silicone Caulk

- Available in white, tan, and gray.
- 10 oz. tubes.
- 100% silicone.
- Great adhesion to numerous substrates.
- Tack free in 30-60 minutes.
- Quickly cures through in 6-12 hours.
- Chemical-resistant formula.

High Solids High-Build Silicone

- Thicker grade silicone top coat that can be applied up to 70 mils in one pass.
- Available in white, tan, light gray, dark gray, black, and clear.

- Used as a top coat or a service product.
- Better sag for vertical surfaces.
- 95%+ solids content.
- Roll on or squeegee.
- Self leveling.

Ready Patch Sealant

- Available in 2-gallon buckets or 20 oz. sausages.
- White, gray, and black.
- No mixing necessary.
- Apply as low as -20°F.

- Can be applied under water/in ponding water.
- Can be coated with silicone, acrylic, and more.
- Elasticity and fibers make it freeze/thaw stable.
